**9Solutions** provides smart care technology for hospitals, care homes, and home care, including real-time locating, nurse call, and safety systems. Its platform enables continuous monitoring, rapid alerts, workflow optimisation, and supports compliance reporting, enhancing patient safety and operational efficiency across care settings.

**Headquarters:** Elekroniikkatie, Finland

**Primary Function:** Screening, Monitoring & Telecare

**Secondary Function:** Compliance and Auditing

**Abyss Systems** offers comprehensive care management software for nursing and residential homes, tracking care delivery, staff, residents, and incidents. Its platform supports regulatory compliance, auditing, and reporting, while built-in analytics help optimise care planning, operational efficiency, and evidence-based decision-making in clinical and non-clinical environments.

**Headquarters:** Stockport, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical & non-clinical)

**Secondary Function:** Compliance and Auditing

**Alcove** delivers connected care technology for home and supported living, combining IoT sensors, smart alerts, virtual care, and AI analytics. Its platform improves patient safety, enables remote monitoring, supports carers and commissioners with real-time insights, and facilitates communication and operational management across non-clinical and clinical care workflows.

**Headquarters:** London, United Kingdom

**Primary Function:** Screening, Monitoring & Telecare  
**Secondary Function:** Patient Communication Platform Supported Living and Home Care Management (non-clinical)

**Alpaka** provides cloud-based workforce management software for care providers and small businesses, automating time tracking, rotas, leave, and absence management. Its platform streamlines HR and payroll processes, improves workforce visibility, and reduces administrative burden, supporting efficient staff deployment and operational planning in clinical and non-clinical care settings.

**Headquarters:** Northampton

**Primary Function:** Care and Nursing Home Management (non-clinical), Supported Living and Home Care Management (non-clinical)

**Arquilla** delivers healthcare technology for care homes, including nurse call, fall detection, real-time alerts, and care workflow platforms. Its solutions improve resident safety, accelerate caregiver response, and support regulatory compliance, while providing actionable data to enhance operational efficiency, risk management, and quality of care in clinical and non-clinical environments.

**Headquarters:** Bournemouth, United Kingdom

**Primary Function:** Screening, Monitoring & Telecare

**Secondary Function:** Compliance and Auditing

**Autumna** is the UK's largest and most comprehensive later-life care directory, helping individuals and families find, compare and choose suitable care options for older adults.

**Headquarters:** Tunbridge Wells

**Primary Function:** Care Matching

**Birdie** is a UK-based digital care management platform for homecare providers, offering unified tools for care planning, eMAR medication management, rostering, finance, quality & compliance, and real-time insights. Its system connects carers, managers and families to streamline operations, reduce administrative burden, and support high-quality, person-centred care delivery.

**Headquarters:** London, United Kingdom

**Primary Function:** Supported Living and Home Care Management (non-clinical & non-clinical)

**Secondary Function:** Compliance and Auditing, Patient Communication Platform

**Camascope** specialises in electronic Medication Administration Record (eMAR) systems that digitise and connect medication management for care homes. Its platform enhances accuracy, compliance and safety by providing real-time prescription data, pharmacy integration, barcode validation and centralised dashboards, reducing errors and freeing up staff time for direct resident care.

**Headquarters:** London, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical), Supported Living and Home Care Management (clinical)

**Care Audit Tool** is a software solution focused on regulatory compliance for care providers, offering dashboards for audits, calendars, statistics, action tracking, category scoring, and visual performance overviews to help organisations remain inspection-ready and maintain high standards of quality and governance.

**Headquarters:** Ipswich, United Kingdom

**Primary Function:** Compliance & Auditing

**Secondary Function:** Data Analytics & AI

**Care Control Systems** offers a comprehensive digital care management platform built for care homes and other settings. Its cloud-based software centralises rostering, medication and care planning, payroll, compliance and reporting, helping providers streamline clinical and operational workflows and improve overall efficiency.

**Headquarters:** Tavistock, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical & non-clinical), Supported Living and Home Care Management (non-clinical & non-clinical)

**Care Vision** is a cloud-based care management system designed for care homes and health settings, integrating care planning, eMAR, audit management, reporting, HR, rostering and other operational functions in a unified platform. It supports person-centred care delivery while streamlining administrative tasks across the care ecosystem.

**Headquarters:** London, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical & non-clinical), Supported Living and Home Care Management (non-clinical & non-clinical)

**Secondary Function:** Compliance and Auditing

**Careberry** is an all-in-one care management platform built by care providers to simplify day-to-day operations. It includes tools for digital care planning, rostering, recruitment, eMAR, invoicing and compliance support, helping homecare and residential services improve efficiency, reduce admin time and manage care delivery more effectively.

**Headquarters:** Aylesbury, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical & non-clinical), Supported Living and Home Care Management (clinical/non-clinical)  
**Secondary Function:** Compliance and Auditing

**CareBuilder** is a long-established cloud-based digital care platform that integrates IoT sensors, communication tools and home automation to support independent living, safety monitoring, and connected care. It enables proactive interventions, flexible deployments and real-time connectivity between users, carers, families and providers to enhance wellbeing and autonomy.

**Headquarters:** London, United Kingdom; Amsterdam, Netherlands

**Primary Function:** Screening, Monitoring & Telecare  
**Secondary Function:** Supported Living and Home Care Management (non-clinical operations), Care Matching, Patient Communication Platform

**CareDocs** provides digital care management software for residential and nursing homes, offering comprehensive electronic care planning, assessments, daily notes, risk scoring, incident reporting, speech-to-text dictation and audit trails. It supports continuity of care, compliance with standards and documentation efficiency for clinical staff and managers.

**Headquarters:** Bristol, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical & non-clinical)

**Secondary Function:** Compliance and Auditing

**CareHQ** is a cloud-based CRM tailored to the UK care market, helping providers transform business operations with tools for workflow automation, process insights, and organisational management — improving engagement, operational visibility, and administrative efficiency across non-clinical functions.

**Headquarters:** Worcester, United Kingdom

**Primary Function:** Care and Nursing Home Management (non-clinical)

**CareLineLive** offers all-in-one home care management software that centralises rostering, client and carer management, eMAR, payroll and invoicing, incident reporting and compliance tools. It integrates real-time data access for carers and families and supports regulatory readiness with secure, compliant digital social care records.

**Headquarters:** Slinfold, United Kingdom

**Primary Function:** Supported Living and Home Care Management (clinical/non-clinical)

**CareLinx** is a technology-enabled home care marketplace that connects families with vetted professional caregivers for personalised in-home support. Its platform helps users find qualified carers for a range of needs — from daily living assistance to clinical support — empowering people to age safely and comfortably at home.

**Headquarters:** Burlingame, California

**Primary Function:** Care Matching  
**Secondary Function:** Supported Living and Home Care Management (clinical/non-clinical)

**CarePoint365** provides a cloud-based care management platform that centralises HR, rostering, time & attendance, CRM and workforce operations for care providers. Built on the Microsoft Power Platform, it streamlines staffing, payroll integration, compliance and reporting, helping teams manage workforce challenges efficiently.

**Headquarters:** Slinfold, United Kingdom

**Primary Function:** Care and Nursing Home Management (non-clinical), Supported Living and Home Care Management (non-clinical)

**Secondary Function:** Compliance and Auditing

**careVITALS** offers all-in-one care management software designed to centralise clinical and non-clinical processes for residential and supported living services. It unifies care documentation, workflows and reporting in a single platform, helping providers simplify delivery while improving coordination and administrative oversight.

**Headquarters:** London, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical & non-clinical), Supported Living and Home Care Management (clinical/non clinical)

**Secondary Function:** Compliance and Auditing, Screening, Monitoring & Telecare

**Cera Care** is a UK-based home healthcare provider that uses digital tools to deliver personalised care, nursing, telehealth and repeat prescriptions in patients' homes. It supports families in arranging care and uses technology to enhance service coordination, caregiver deployment and outcomes across clinical and non-clinical home care.

**Headquarters:** London, United Kingdom

**Primary Function:** Care Matching, Supported Living and Home Care Management (clinical/non clinical)

**Secondary Function:** Patient Communication Platform  
Screening, Monitoring & Telecare

**CoolCare** develops comprehensive care home administration software to simplify non-clinical care management tasks. Its suite includes functions such as resident records, staff management, time & attendance and house operations, reducing administrative burden and enhancing operational efficiency for care home teams.

**Headquarters:** Garforth, United Kingdom

**Primary Function:** Care and Nursing Home Management (non-clinical)

**Cubigo** is a senior living community platform that streamlines daily non-clinical operations, integrating services such as activities, dining, maintenance and resident engagement into a single digital interface. It improves staff efficiency, reduces administrative load and enhances resident and family connectivity.

**Headquarters:** Hasselt, Belgium

**Primary Function:** Care and Nursing Home Management (non-clinical)

**Secondary Function:** Patient Communication Platform

**Elate** provides digital care and support planning tools for care providers, helping manage care needs assessments, personalised support plans, risk assessments, scheduling and eMAR medication management. Its platform supports both clinical and non-clinical workflows in supported living and home care settings.

**Headquarters:** Exeter, United Kingdom

**Primary Function:** Supported Living and Home Care Management (clinical & non-clinical)

**Empathika** offers a unified care home management system combining medication and eMAR tracking, digital care planning, staff scheduling, HR, recruitment, compliance and training tools. Its platform simplifies workforce coordination and clinical workflows while strengthening compliance and operational visibility.

**Headquarters:** London, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical & non-clinical)

**Secondary Function:** Compliance and Auditing

**eZaango Care Partners** operates as a care services network that supports home care and supported living providers with workforce solutions and operational support systems. It focuses on non-clinical service coordination and staffing support to improve delivery and sustain quality at scale.

**Headquarters:** Melbourne, Australia

**Primary Function:** Supported Living and Home Care Management (non-clinical)

**Secondary Function:** Patient Communication Platform

**Florence** provides technology and workforce management tools tailored for the health and care sectors, offering shift scheduling, staffing agency coordination, HR functions and access to contingent workers. Its platform helps organisations address staffing gaps efficiently and improve operational workforce planning.

**Headquarters:** London, United Kingdom

**Primary Function:** Care and Nursing Home Management (non-clinical), Supported Living and Home Care Management (non clinical)

**Found by Lottie** is a cloud-based CRM and care matching system designed for care homes and providers to capture and manage enquiries, occupancy, leads and resident matching. It helps providers streamline intake, enhance occupancy and improve operational awareness in care placement processes.

**Headquarters:** London, United Kingdom

**Primary Function:** Care and Nursing Home Management (non-clinical)

**GenieConnect** provides connected care technology that supports remote monitoring and telecare, including wearable pendants, fall detection, GPS tracking and cloud-based dashboards. Its solutions enable real-time alerts, safety monitoring and proactive support for older and vulnerable people living independently, enhancing reassurance for carers and families.

**Headquarters:** Bristol, United Kingdom

**Primary Function:** Screening, Monitoring & Telecare

**Secondary Function:** Family Carers (Support and Care Management), Supported Living and Home Care Management (non-clinical)

**InvictIQ** delivers cloud-based compliance, audit, and quality management solutions for health and social care, combining data insights and digital tools to streamline operations, improve inspections, and maintain regulatory standards.

**Headquarters:** London, England

**Primary Function:** Compliance and Auditing

**Haill.ai** uses artificial intelligence and data analytics to monitor and support individuals at risk of falls or health deterioration. Its sensor-agnostic AI platform interprets in-home movement and behaviour patterns to detect anomalies early, helping care teams intervene proactively and improve safety and outcomes through predictive insights.

**Headquarters:** London, United Kingdom

**Primary Function:** Screening, Monitoring & Telecare  
Secondary Function: Family Carers (Support and Care Management), Patient Communication Platform  
Supported Living and Home Care Management (non-clinical)

**Health Automated** offers digital care administration and operational tools that support care management functions such as scheduling, documentation, incident reporting, compliance tracking and analytics. Its integrated platform helps care organisations streamline workflows and administrative processes across both supported living and care home settings.

**Headquarters:** Thetford, United Kingdom

**Primary Function:** Care and Nursing Home Management (clinical/non-clinical), Supported Living and Home Care Management (clinical/non clinical)

**Secondary Function:** Compliance and Auditing

Where can you obtain 140 years experience in Care to work to your advantage? **Insequa** helps social care providers win more contracts, stay CQC-compliant and drive quality, with smart tech that puts policies and real-time analytics at your fingertips. We excel in tendering, compliance, social value and sustainable, long-term growth.

**Headquarters:** Farnsfield, United Kingdom

**Primary Function:** Compliance and Auditing

**Secondary Function:** Supported Living and Home Care Management (non-clinical), Care and Nursing Home Management (non-clinical)

**IntroEase** is a UK-based care matching and CRM solution designed for care providers to capture inquiries, manage leads and match prospective residents with suitable care options efficiently, improving occupancy and customer engagement through structured placement workflows.

**Headquarters:** London, United Kingdom

**Primary Function:** Care Matching

**Secondary Function:** Family Carers (Support and Care Management), Supported Living and Home Care Management (non-clinical)

**KareHero** offers a digital platform to help families find, organise and pay for trusted carers. It connects families with qualified care professionals and provides support tools for care coordination, scheduling and communication, giving family carers more control, choice and visibility over home care arrangements.

**Headquarters:** London, United Kingdom

**Primary Function:** Family Carers (Support and Care Management), Care Matching

**Kiin** is a care coordination app targeted to reduce the emotional burden on informal carers, reduce their burnout and in-turn, increase the time you can care for a loved-one at home.

**Headquarters:** London, United Kingdom

**Primary Function:** Family Carers (Support and Care Management)

**Lifted** is a workforce management platform that combines staffing operations with compliance oversight. It includes features for rostering, time & attendance, staff performance tracking and compliance reporting, helping care providers manage workforce challenges while ensuring regulatory requirements are met.

**Headquarters:** London, United Kingdom

**Primary Function:** Care and Nursing Home Management (non-clinical), Supported Living and Home Care Management (non clinical), Compliance and Auditing

**Lilli Health's** technology provides smart monitoring and AI-enabled supervision solutions for care environments. Its platform combines sensor data and analytics to flag health and safety risks, track activity patterns, and support proactive care interventions, enhancing resident safety and reducing avoidable incidents.

**Headquarters:** Woking, United Kingdom  
**Primary Function:** Screening, Monitoring & Telecare

**Log my Care** is the care management platform built to make proactive, person-led care possible. It's a trusted choice across every care setting – from home care and supported living to residential services.

**Headquarters:** London, United Kingdom  
**Primary Function:** Supported Living and Home Care Management (clinical/non-clinical), Care and Nursing Home Management (clinical/non-clinical)  
**Secondary Function:** Compliance and Auditing

**Lottie** is a CRM and care placement platform that helps home care and residential providers manage leads, enquiries and resident matching. It streamlines admissions workflows, supports occupancy growth and improves stakeholder engagement through intelligent enquiry tracking and service matching.

**Headquarters:** London, United Kingdom  
**Primary Function:** Care Matching

**Lumiio** delivers a patient and resident engagement platform that connects care organisations with individuals and families through secure messaging, updates, notifications, video calls and information sharing. It enhances communication, improves transparency, and fosters stronger relationships between care teams, patients and loved ones.

**Headquarters:** London, United Kingdom  
**Primary Function:** Patient Communication Platform

**Milbotix** develops wearable sensor technology embedded in everyday clothing (e.g., SmartSocks®) that continuously capture physiological data such as pulse, temperature, movement and stress indicators. Designed for healthcare and social care use, its solutions support unobtrusive monitoring and early detection of distress or health changes in vulnerable individuals.

**Headquarters:** Chipping Norton, United Kingdom  
**Primary Function:** Screening, Monitoring & Telecare  
**Secondary Function:** Family Carers (Support and Care Management), Supported Living and Home Care Management (non-clinical), Care and Nursing Home Management (non-clinical)

**MOA Benchmarking** provides a digital governance, compliance and quality improvement platform for adult social care providers. Its system centralises audits, self-assessments, incident tracking, feedback and risk registers aligned with CQC frameworks, helping organisations evidence compliance, benchmark performance and drive continuous improvement.

**Headquarters:** London, United Kingdom  
**Primary Function:** Compliance & Auditing

**Mobilise** is a UK digital support platform and community for unpaid family carers, offering expert guidance, peer-to-peer support, wellbeing resources, live events, online courses and topic-based tools. It helps carers connect with others, access advice 24/7, and navigate the emotional and practical challenges of caring.

**Headquarters:** London, United Kingdom  
**Primary Function:** Family Carers (Support and Care Management)

**Nobi** delivers smart home safety technology, including AI-powered fall detection and sensor systems designed for independent living. Its solutions enable continuous movement and activity monitoring, alerting caregivers to changes or risks while integrating unobtrusively into living environments to support safety and early intervention.

**Headquarters:** Antwerpen, Belgium  
**Primary Function:** Screening, Monitoring & Telecare

**Nourish Care** is a digital care management platform used by care providers to streamline personalised care planning, rostering, visit scheduling, incident reporting and team training. It centralises service data, improves operational visibility and supports care delivery aligned with best practice across home care and supported living services.

**Headquarters:** Bournemouth, United Kingdom  
**Primary Function:** Supported Living and Home Care Management (clinical/non-clinical), Care and Nursing Home Management (clinical/non-clinical)  
**Secondary Function:** Patient Communication Platform

**Nursebuddy** offers a modern domiciliary care management system that connects carers, managers, clients and families. Its platform includes workflows for care planning, visit tracking, client records and communication tools designed to enhance home care delivery and team coordination.

**Headquarters:** Tampere, Finland  
**Primary Function:** Supported Living and Home Care Management (clinical & non-clinical)

**OneAdvanced's** Care Business Management platform is a comprehensive care management solution combining person-centred care planning, rostering, payroll, invoicing, compliance reporting and analytics. It supports care homes, supported living and domiciliary services with unified data and operational tools for high-quality, compliant care delivery.

**Headquarters:** Birmingham, United Kingdom  
**Primary Function:** Care and Nursing Home Management (clinical & non-clinical), Supported Living and Home Care Management (clinical & non-clinical)

**OneCare Platform** delivers an all-in-one digital solution for community care providers, integrating care planning, client records, scheduling, and operational workflows to support both clinical and non-clinical aspects of domiciliary and supported living services.

**Headquarters:** Farnham, United Kingdom  
**Primary Function:** Supported Living and Home Care Management (clinical & non-clinical)  
**Secondary Function:** Compliance and Auditing

**OneTouch Health** provides a unified care management ecosystem that helps providers schedule carers and client appointments, manage digital care plans, coordinate staffing, and handle invoicing and compliance tasks across home care and residential settings. Its platform improves operational coordination and supports quality care delivery.

**Headquarters:** Galway, Republic of Ireland  
**Primary Function:** Care and Nursing Home Management (clinical & non-clinical), Supported Living and Home Care Management (clinical & non-clinical)  
**Secondary Function:** Patient Communication Platform, Compliance and Auditing

**Person Centred Software** offers an integrated care management suite that spans clinical and non-clinical functions, including care planning, medication management (eMAR), clinical records, reporting and communication tools. Its platform supports care homes and community services with connected workflows and operational visibility.

**Headquarters:** Guildford, United Kingdom  
**Primary Function:** Supported Living and Home Care Management (clinical & non-clinical), Care and Nursing Home Management (clinical & non-clinical)  
**Secondary Function:** Compliance and Auditing

**PredicAire** delivers a cloud-based care management platform used by providers to streamline care planning, rostering, client records, reviews and reporting. Its system supports both clinical and non-clinical workflows in home care and residential settings, enabling coordinated operations and improved service delivery.

**Headquarters:** Suffolk, United Kingdom  
**Primary Function:** Supported Living and Home Care Management (clinical & non-clinical), Care and Nursing Home Management (clinical & non-clinical)  
**Secondary Function:** Patient Communication Platform, Compliance and Auditing

**Quality Compliance Systems** provides digital quality management and compliance software tailored to health and social care. Its system centralises audits, policies, incident reporting and action tracking while also supporting care operations, performance insights and regulatory readiness across both community and care home environments.

**Headquarters:** Uxbridge, United Kingdom  
**Primary Function:** Compliance and Auditing, Supported Living and Home Care Management (clinical & non-clinical), Care and Nursing Home Management (clinical & non-clinical)

**Qwikify** offers an integrated care management platform designed for care homes and domiciliary providers, centralising care planning, medication records, rostering and visit tracking. Its tools help teams manage clinical and non-clinical processes while maintaining operational oversight and resident wellbeing.

**Headquarters:** Buckinghamshire, United Kingdom  
**Primary Function:** Supported Living and Home Care Management (clinical & non-clinical), Care and Nursing Home Management (clinical & non-clinical)

**Radar Healthcare** provides a safety, quality and risk management platform for health and care organisations. Its software supports incident reporting, risk assessments, audits, learning records and governance frameworks, helping providers maintain compliance, reduce harm and drive continuous quality improvement.

**Headquarters:** Leeds, United Kingdom  
**Primary Function:** Compliance & Auditing

**Relish Wellbeing** offers a digital engagement platform that connects care providers with individuals and families, delivering personalised wellbeing content, updates, secure messaging and activity tracking. It enhances communication and supports holistic wellbeing journeys between services and users.

**Headquarters:** London United Kingdom  
**Primary Function:** Patient Communication Platform  
**Secondary Function:** Supported Living and Home Care Management (clinical & non-clinical), Care and Nursing Home Management (clinical & non-clinical)

**RotaCloud** delivers cloud-based workforce management software used across sectors, including care, to simplify employee scheduling, shift planning, time & attendance tracking, leave management and payroll integration. It helps organisations reduce admin time, improve staff visibility and optimise workforce allocation.

**Headquarters:** New York, United States  
**Primary Function:** Care and Nursing Home Management (non-clinical), Supported Living and Home Care Management (non-clinical)

**Seniorcare** by Lottie is an employee benefit eldercare support and care concierge service designed to help organisations support staff who are caring for elderly relatives. It combines a co-branded digital platform with in-house Care Experts who provide personalised guidance on finding, funding, and planning care.

**Headquarters:** London, United Kingdom  
**Primary Function:** Family Carers (Support and Care Management)

**StoriiCare** is a person-centred care planning and record-keeping platform for care homes and supported living providers, combining care planning, activities logging, risk assessments and outcomes tracking. Its platform boosts team coordination, resident engagement and documentation compliance across clinical and non-clinical functions.

**Headquarters:** San Mateo, United States  
**Primary Function:** Care and Nursing Home Management (clinical & non-clinical), Supported Living and Home Care Management (clinical & non-clinical)

**Sensio** provides connected care and telecare solutions, including sensor-based monitoring, fall detection, bed/chair occupancy alerts and activity profiling. Its technology helps carers and families remotely monitor wellbeing, detect risks early, and support independent living with real-time alerts and peace of mind.

**Headquarters:** Oslo, Norway  
**Primary Function:** Screening, Monitoring & Telecare  
**Secondary Function:** Patient Communication Platform

**SMI** offers care home management software focused on non-clinical operations such as rostering, staff records, payroll interfaces and administrative workflows. Its tools help organisations manage workforce data and non-clinical tasks efficiently.

**Headquarters:** London, United Kingdom  
**Primary Function:** Care and Nursing Home Management (non-clinical)

**Syncurio** delivers digital resident record management and care administration tools designed for nursing and care homes. Its platform supports non-clinical operations including care notes, assessments, activities, audits and reporting, improving documentation accuracy and operational clarity.

**Headquarters:** London, United Kingdom  
**Primary Function:** Care and Nursing Home Management (non-clinical)  
**Secondary Function:** Compliance & Auditing

**Teton.ai** is a Nordic health technology company using AI-driven resident monitoring to transform care homes and clinical environments. Its platform applies machine learning to real-time data such as vitals, behaviours and fall incidents to shift care from reactive to proactive, improving safety and outcomes.

**Headquarters:** København, Denmark  
**Primary Function:** Screening, Monitoring & Telecare  
**Secondary Function:** Compliance & Auditing

**The Access Group** provides a comprehensive suite of software for health and social care, including integrated care management, clinical records, scheduling, finance, compliance reporting and patient portals. Its solutions support care homes, homecare services and community providers with unified operations and regulatory readiness.

**Headquarters:** Loughborough, United Kingdom  
**Primary Function:** Care and Nursing Home Management (clinical/non-clinical), Supported Living and Home Care Management (clinical/non-clinical), Compliance and Auditing  
**Secondary Function:** Supported Living and Home Care Management (non-clinical), Care and Nursing Home Management (non-clinical)

**TrustonTap** connects families with local, vetted caregivers for flexible home care services including personal and companionship support, hourly and live-in options. It helps users find compatible carers and manage care arrangements that support independent living.

**Headquarters:** Abingdon, United Kingdom  
**Primary Function:** Care Matching

**Tunstall Healthcare** is a long-established provider of telecare and technology-enabled care services including connected monitoring systems, fall detection, sensor networks and 24/7 response support that help people live independently while keeping carers informed.

**Headquarters:** Doncaster, United Kingdom  
**Primary Function:** Screening, Monitoring & Telecare  
**Secondary Function:** Family Carers (Support and Care Management), Supported Living and Home Care Management (non-clinical)

**Unique IQ** offers care management and remote workforce optimisation software that simplifies clinical and non-clinical operations, enhances staff communication and reduces paperwork, helping providers manage care delivery efficiently.

**Headquarters:** Redditch, United Kingdom  
**Primary Function:** Supported Living and Home Care Management (clinical & non-clinical)

**ViClarity Europe** provides quality, risk and compliance software for health and social care settings. Its centralised platform automates audits, incident reporting, risk management and documentation workflows, giving managers real-time visibility of compliance status and regulatory performance.

**Headquarters:** Tralee, Republic of Ireland  
**Primary Function:** Compliance & Auditing

**Wellola** delivers Portasana®, a comprehensive, modularised and fully interoperable patient care and communications platform (forms, education, symptom tracking etc.) to enhance patient engagement and supported self-management via a single, unified digital interface.

**Headquarters:** Leeds, United Kingdom  
**Primary Function:** Patient Communication Platform  
**Secondary Function:** Screening, Monitoring & Telecare

**WHZAN** provides remote monitoring technology that combines vital health data with daily activity patterns to support accurate assessment, early risk detection and automated alerts for carers and clinicians, helping vulnerable individuals remain safe in their homes.

**Headquarters:** Ryde, United Kingdom  
**Primary Function:** Screening, Monitoring & Telecare
